Fuel Cell Technology for Classroom Instruction

BASIC PRINCIPLES, EXPERIMENTS, WORK SHEETS

Content

| | |
|---------|----|
| Preface | 09 |
|---------|----|

Part 1 Basic principles

| | |
|--------------------------------------|----|
| 1.1. Solar-Hydrogen Energy Cycle | 12 |
| 1.2. Solar Energy | 13 |
| 1.3. PEM Electrolyzer | 17 |
| 1.4. Hydrogen Storage | 18 |
| 1.5. History of Fuel Cell Technology | 19 |
| 1.6. Types of Fuel Cells | 20 |
| 1.7. PEM Fuel Cell | 22 |
| 1.8. Fuel Cell Stack | 23 |
| 1.9. Direct Methanol Fuel Cell | 24 |
| 1.10. Portable Applications | 25 |
| 1.11. Mobile Applications | 25 |
| 1.12. Stationary Applications | 26 |

Part 2 Solutions to experiments

| | |
|---|----|
| 2.1. Current-voltage characteristic, power curve and efficiency of solar module | 30 |
| 2.2. Current-voltage characteristic of PEM electrolyzer | 35 |
| 2.3. Energy efficiency and Faraday efficiency of PEM electrolyzer | 39 |
| 2.4. Current-voltage characteristic and power curve of PEM fuel cell | 45 |
| 2.5. Energy efficiency and Faraday efficiency of PEM fuel cell | 49 |
| 2.6. Current-voltage characteristic of direct methanol fuel cell | 56 |

Part 3 Work sheets and student experiments

| | |
|---------------------------------------|----|
| 3.1. Information for handout | |
| 3.1.1. Solar-Hydrogen Energy Cycle | 61 |
| 3.1.2. Hydrogen | 62 |
| 3.1.3. Fuel Cell | 64 |
| 3.1.4. Electrolyzer | 65 |
| 3.2. Solutions to student work sheets | |
| 3.2.1. Solar-Hydrogen Energy Cycle | 67 |
| 3.2.2. Hydrogen | 68 |

| | |
|--|-----|
| 3.2.3. Fuel Cell | 69 |
| 3.2.4. Electrolyzer | 70 |
| 3.3. Student work sheets (Basic and advanced level) | |
| 3.3.1. Solar-Hydrogen Energy Cycle | 71 |
| 3.3.2. Hydrogen | 72 |
| 3.3.3. Fuel Cell | 73 |
| 3.3.4. Electrolyzer | 74 |
| 3.4. Experiment work sheets (Basic level) | |
| 3.4.1. Current-voltage characteristic, power curve and efficiency of solar module | 75 |
| 3.4.2. Current-voltage characteristic of PEM electrolyzer | 78 |
| 3.4.3. Energy efficiency of PEM electrolyzer | 81 |
| 3.4.4. Current-voltage characteristic and power curve of PEM fuel cell | 85 |
| 3.4.5. Energy efficiency of PEM fuel cell | 88 |
| 3.5. Experiment work sheets (Advanced level) | |
| 3.5.1 Current-voltage characteristic, power curve and efficiency of solar module | 91 |
| 3.5.2. Current-voltage characteristic of PEM electrolyzer | 94 |
| 3.5.3. Energy efficiency and Faraday efficiency of PEM electrolyzer | 97 |
| 3.5.4. Current-voltage characteristic and power curve of PEM fuel cell | 102 |
| 3.5.5. Energy efficiency and Faraday efficiency of PEM fuel cell | 105 |
| 3.5.6. Current-voltage characteristic of direct methanol fuel cell | 109 |

Appendix

| | |
|-------------------------------|-----|
| Glossary | 114 |
| Recommended Literature/ Links | 118 |
| Index | 119 |
| Table of figures and sources | 120 |

C. Voigt, S. Hoeller, U. Kueter

Fuel Cell Technology for Classroom Instruction

BASIC PRINCIPLES, EXPERIMENTS, WORK SHEETS

This book provides a clear introduction and overview to fuel cell technology and its associated subject areas.

Examples of experiments using solar cells, electrolysis and fuel cells convey the knowledge for forthcoming tests in an understandable manner.

The preparation of classroom experiments is made considerably easier for the teacher thanks to the experiment work sheets. These contain the necessary information concerning the material, set-up and execution of the experiment, and questions for evaluation purposes.

The training documents and student work sheets combine the basic knowledge, questions and answers, and are ideal for copying.

A comprehensive glossary at the end of the book explains all the important technical terms.
